Subject: Opposed to HB 4575: I support local measures. I support alternatives to gas.

Dear Regulatory Reform Committee Members,

I support allowing local jurisdictions address codes that support the needs of the people that they represent. HB 4575 is too explicit with respect to eliminating local measures. We should have the choice to make our communities safe and ready for the future. The addition of a prohibition on use of gas appliances limits the ability of a municipality to innovate, and it is unnecessary.

Please, look to the future, and help us move past the indoor pollution that is associated with gas appliances.

Please vote NO on HB 4575.

Thank you.

Sincerely,

Rita Mitchell
