Dear Representative Helena Scott,

I recently learned that DTE wants to raise rates by \$622 million, the highest rate increase in state history. We already pay the highest rates paired with the worst reliability in the Midwest. We can't afford another rate increase, especially when DTE can't keep the power on as it is.

Over the past 12 months, DTE has tried to raise our rates by \$1 billion. Enough is enough. DTE is asking for more of our money and they aren't being made to improve their service. DTE must do better, and I ask that you hold them accountable.

Sincerely,
Scott Morrow

Dear Representative Scott,

I write to you as a frustrated mom who is having a lot of trouble right now figuring out what is going on with DTE. We haven't had power or heat in my house for five days. I am fortunate, privileged, and blessed that we have a warm place to stay, and our only losses include groceries from the fridge, but really, it's been almost a week, I should be back home now. I have a young toddler, I have an expectant neighbor, as well as elderly neighbors on my street who I am also very concerned about (our address is 2215 Kalama avenue, Royal Oak MI 48067) We also have neighbors who had issues with their sump pump and basement completely flooded.

I can't seem to get a straight answer on when my power will be restored. DTE does not answer their phone and their app doesn't work. I can't even contact anyone for help. I know they have crews out who are working so hard- this is not their fault. I just want my power back and I want clarity.

I also do not want DTE even THINKING of raising our costs this year, because we all know that corporate greed is a huge issue and must be stopped. DTE reported a \$1.3 BILLION dollar profit last year. And they will only give us a shameful \$25 credit! Would you be able to look more into this and hold DTE accountable? I know we are not the only constituents of yours who are currently frustrated with them, too.

Thank you for everything you do, Rep. Scott- we proudly voted for you last election. We hope you too are also staying safe.

Sincerely,
Leslee Markose

The recent power outage that started 2/22/23 cost me personally over \$1000 with 2 full days of lost work (no power at work) and food thrown away, having to eat out due to not being able to eat at home, & my husband having to find places he could work. It was ridiculous, and they want more money?????

Electricity is a necessity not a privilege. Most jobs are not paying more due to inflation, yet we are expected to pay higher utilities. Socioeconomic status' are not equal! There are many that can be hurt by this! Also, how about they take accountability for their consistency of services!

Sincerely,

Subject: Power Outage - Day 6

You don't often get email from melissa.nita18@gmail.com. [Learn why this is important](#)

Good Morning Rep. Helena Scott,

My name is Melissa Nita and I am a resident of Royal Oak, Michigan. I live at 506 West Lincoln Ave. We have been out of power since Wednesday, February 23rd around 3 p.m. Since then, we have gotten three updates on power restoration, however, it has never come back on. Currently, the DTE Outage Map states "New Restoration Date in Progress". There are only 19 houses on our block that are out of power, so many of us feel that we have completely been overlooked.

I am confused as to why this is not considered a state of emergency after six days without power? We live in Michigan, where winters without heat is not an option. Our fridge full of groceries has gone bad and we have been only offered a \$25 credit. My family, which includes my husband, my two year old, my dog, and myself who is 8 months pregnant. Having no power or food and being displaced for almost a week seems completely unacceptable.

I have contacted DTE several times and have gotten nowhere. We are beyond frustrated and completely at a loss of what to do next. I am asking for help - help contacting others, help restoring our power, help making this an emergency situation, anything at this point.

I appreciate you taking time to read this message and look forward to hearing back from you.

Melissa Nita

My husband and I were without power from February 22 to February 27 🙄. No, we don't live in a remote rural area ... we live in Royal Oak!!! Your outage map is unreliable and frustrating; I recognize that we had a storm, but it CERTAINLY wasn't bad or long enough to warrant that kind of outage. I'm inclined to believe that DTE just didn't have the necessary equipment on hand to fix the problems (i.e., transformers!!!)

You must do BETTER before expecting consumers to just pay up ...

Sincerely,

Dear Representative Helena Scott,

I recently learned that DTE wants to raise rates by \$622 million, the highest rate increase in state history. We already pay the highest rates paired with the worst reliability in the Midwest. We can't afford another rate increase, especially when DTE can't keep the power on as it is.

Over the past 12 months, DTE has tried to raise our rates by \$1 billion. Enough is enough. DTE is asking for more of our money and they aren't being made to improve their service. DTE must do better, and I ask that you hold them accountable.

They cut down tree branches haphazardly exposing them to infestations and instability and then when tree branches fall from ice or high winds, it's the customers who pay with restaurant/hotel bills, ruined food etc. DTE has already passed their costs on to us.

Sincerely,
Theresa McGuire

Dear Representative Helena Scott,

Each time the power goes out, our community takes a hit. We spend hundreds of dollars replacing spoiled food, and miss days of work or school. For elderly family members and neighbors, who are vulnerable to heat exposure, and for people with medical devices that require electricity, blackouts can be deadly. Nearly a million people in Michigan are without power today, with nighttime temperatures falling well below freezing in the coming days.

Meanwhile, our state's investor-owned monopoly utilities shovel profits to shareholders and evade accountability for the real costs of their failing infrastructure.

In short, hundreds of thousands of families are sitting in the cold without power again because DTE has prioritized shareholder profits over affordable, reliable electricity for customers. What's worse, DTE pours money into campaign donations and lobbying because it's paid off for them. More than 90 percent of state legislators took money from DTE in the 2022 election. They've effectively escaped accountability despite consistent public outrage at their awful service, long blackouts, and rising rates.

Sincerely,

But it doesn't have to be this way. Michiganders shouldn't go days on end without power while nothing is done because we haven't mustered the political courage to stand up to an investor-owned utility bully.

That is why I am writing to encourage you to stand firmly in your values & show people whose side you're on. Customers deserve automatic, hourly compensation for hours in the dark – and utilities should not be able to raise rates to cover the costs of compensation if they perform worse than their peers in the industry.

We need reliable, affordable, people-centered energy that meets the needs of all Michiganders. When the power goes out, it's always an inconvenience, but for many it can have huge consequences for their health and finances.

Will you take action to reimburse customers who've been consistently failed by DTE, and take further action to hold DTE accountable for the damage they've caused our communities?

Thank you,

Sincerely,
Arturo Reyes

Subject: DTE Power Outage

Message Body: sent from a contact form

Dear Rep. Scott, I lost power on Wednesday, 2/22 at 9:30 pm and my power was finally restored on Tuesday, 2/28 at 11:30 am. I received minimal information from DTE, and their estimated time for restoration changed from Sunday to Monday to Wednesday, and then I got my power on Tuesday (today). The communication from DTE is horrible and the lack of accountability is shocking. I know the line workers were working hard; I question the leadership. The \$35 credit I have been promised will help but not offset the over \$200 in food I lost, missed work time, not to mention the waste of water because I had to set all my taps dripping so my pipes wouldn't freeze. I am fortunate that I was able to stay with a friend. What about the people who couldn't do that, people with children, people with medical conditions who were severely impacted. You are chair of the Energy Committee. I would like to know what your plans are to address this issue with DTE and hold them accountable for their lack of trustworthy infrastructure and abysmal communications. We do not live in war-torn Ukraine, where lengthy power outages are a way of life. We live in Michigan, which is unfortunately ranked 5th worst in the nation for power reliability.

The Governor wants to attract people to the state and encourage the purchase of EVs. DTE is not an advertisement for either of those things. Thank you for listening.

Dear Representative Scott,

I am writing to express my concern regarding DTE Energy's failure to deliver on its responsibility to provide reliable and affordable energy to its customers. The recent power outages resulting from ice storms across the state left over 600,000 DTE customers without power, and many residents in Southern Michigan without electricity for consecutive days.

Personally, my Royal Oak block loses power more often than not whenever wind or heavy rain occurs. We have experienced many days long outages in the past decade, including a five day long outage during near zero temperatures. This is life threatening - and FRUSTRATING.

Yet, in the face of widespread power outages affecting DTE customers across the utility's service area, DTE is proposing record-breaking rate increases that threaten to raise energy bills for customers. Many of whom are already struggling to make ends meet as the cost of living crisis continues to grow.

As your constituent, I urge you to hold hearings in the State House and Senate Energy Committees to discuss rapid response for residents in need of relief and to evaluate solutions to better meet the needs of Michiganders, not the utility's bottom line. We cannot let DTE Energy continue to prioritize profits over the well-being of Michiganders. These hearings must include testimony from independent experts and impacted residents - not just DTE spokespeople.

Furthermore, I urge you to require utilities to compensate or refund customers more fairly for the harm caused by power outages and negligence on the part of the utility. DTE Energy's failures have resulted in significant harm to the people of Michigan, and the utility must be held accountable.

We need to ensure that our energy providers are providing reliable, affordable, and sustainable energy to Michiganders. Its clear that this recent extreme weather will not be the last time that the reliability of our electric grid is tested, and the need for solutions that prioritize Michigan's wallets, health, and climate has never been greater. I urge you to take swift action to hold DTE Energy accountable and to protect the well-being of Michiganders.

Thank you for your attention to this critical issue.

Sincerely,

Sincerely,
Elizabeth Cabot
25645 York Rd

Dear Representative Helena Scott,

Each time the power goes out, our community takes a hit. We spend hundreds of dollars replacing spoiled food, and miss days of work or school. For elderly family members and neighbors, who are vulnerable to heat exposure, and for people with medical devices that require electricity, blackouts can be deadly. Nearly a million people in Michigan are without power today, with nighttime temperatures falling well below freezing in the coming days.

Meanwhile, our state's investor-owned monopoly utilities shovel profits to shareholders and evade accountability for the real costs of their failing infrastructure.

In short, hundreds of thousands of families are sitting in the cold without power again because DTE has prioritized shareholder profits over affordable, reliable electricity for customers. What's worse, DTE pours money into campaign donations and lobbying because it's paid off for them. More than 90 percent of state legislators took money from DTE in the 2022 election. They've effectively escaped accountability despite consistent public outrage at their awful service, long blackouts, and rising rates.

But it doesn't have to be this way. Michiganders shouldn't go days on end without power while nothing is done because we haven't mustered the political courage to stand up to an investor-owned utility bully.

That is why I am writing to encourage you to stand firmly in your values & show people whose side you're on. Customers deserve automatic, hourly compensation for hours in the dark – and utilities should not be able to raise rates to cover the costs of compensation if they perform worse than their peers in the industry.

We need reliable, affordable, people-centered energy that meets the needs of all Michiganders. When the power goes out, it's always an inconvenience, but for many it can have huge consequences for their health and finances.

Will you take action to reimburse customers who've been consistently failed by DTE, and take further action to hold DTE accountable for the damage they've caused our communities?

Thank you,

Sincerely,
Kitty Daly

Dear Representative Scott,

I am writing to express my concern regarding DTE Energy's failure to deliver on its responsibility to provide reliable and affordable energy to its customers. The recent power outages resulting from ice storms across the state left over 600,000 DTE customers without power, and many residents in Southern Michigan without electricity for consecutive days.

Yet, in the face of widespread power outages affecting DTE customers across the utility's service area, DTE is proposing record-breaking rate increases that threaten to raise energy bills for customers. Many of whom are already struggling to make ends meet as the cost of living crisis continues to grow.

As your constituent, I urge you to hold hearings in the State House and Senate Energy Committees to discuss rapid response for residents in need of relief and to evaluate solutions to better meet the needs of Michiganders, not the utility's bottom line. We cannot let DTE Energy continue to prioritize profits over the well-being of Michiganders. These hearings must include testimony from independent experts and impacted residents - not just DTE spokespeople.

Furthermore, I urge you to require utilities to compensate or refund customers more fairly for the harm caused by power outages and negligence on the part of the utility. DTE Energy's failures have resulted in significant harm to the people of Michigan, and the utility must be held accountable.

We need to ensure that our energy providers are providing reliable, affordable, and sustainable energy to Michiganders. Its clear that this recent extreme weather will not be the last time that the reliability of our electric grid is tested, and the need for solutions that prioritize Michigan's wallets, health, and climate has never been greater. I urge you to take swift action to hold DTE Energy accountable and to protect the well-being of Michiganders.

Thank you for your attention to this critical issue.

Dear Representative Helena Scott,

Each time the power goes out, our community takes a hit. We spend hundreds of dollars replacing spoiled food, and miss days of work or school. For elderly family members and neighbors, who are vulnerable to heat exposure, and for people with medical devices that require electricity, blackouts can be deadly. Nearly a million people in Michigan are without power today, with nighttime temperatures falling well below freezing in the coming days.

Meanwhile, our state's investor-owned monopoly utilities shovel profits to shareholders and evade accountability for the real costs of their failing infrastructure.

In short, hundreds of thousands of families are sitting in the cold without power again because DTE has prioritized shareholder profits over affordable, reliable electricity for customers. What's worse, DTE pours money into campaign donations and lobbying because it's paid off for them. More than 90 percent of state legislators took money from DTE in the 2022 election. They've effectively escaped accountability despite consistent public outrage at their awful service, long blackouts, and rising rates.

But it doesn't have to be this way. Michiganders shouldn't go days on end without power while nothing is done because we haven't mustered the political courage to stand up to an investor-owned utility bully.

That is why I am writing to encourage you to stand firmly in your values & show people whose side you're on. Customers deserve automatic, hourly compensation for hours in the dark – and utilities should not be able to raise rates to cover the costs of compensation if they perform worse than their peers in the industry.

We need reliable, affordable, people-centered energy that meets the needs of all Michiganders. When the power goes out, it's always an inconvenience, but for many it can have huge consequences for their health and finances.

Will you take action to reimburse customers who've been consistently failed by DTE, and take further action to hold DTE accountable for the damage they've caused our communities?

Thank you,

Sincerely,
Stefanie della Porta

Dear Representative Helena Scott,

I am reaching out to ask you to help hold DTE accountable. The frequency of the power outages we experience in Southeast Michigan and the long restoration times are unacceptable. My family lost power for 3 days after last week's ice storm and everyone we know was affected in some way. The stress and financial burden this places on Michiganders every time they experience a power outage is extremely disruptive. It is frustrating to hear DTE try to avoid responsibility by blaming the weather, while the only action they take is to promise to trim the trees.

There should be a moratorium on all rate increases until there is an independent investigation into why Michiganders suffer through more and longer outages than any other state in the Great Lakes Region. Furthermore, hearings should be held on failures by DTE and Consumers Energy during last week's storms that left Michiganders without power.

Sincerely,
Megan Riherd

Subject: Hold Michigan's Energy Utilities Accountable For Power Outages

Dear Rep. Helena Scott,

I am writing to voice my concern over our utilities failure to deliver on their responsibility to provide reliable and affordable energy to their customers, specifically DTE. Over the last week, an ice storm knocked out power to over 600,000 DTE and over 200,000 Consumers Energy ratepayers in Michigan. Almost a week later, tens of thousands are still without power. This is unacceptable and we as ratepayers deserve answers and action.

For far too long, Michigan's utility companies have been charging astronomical rates while providing some of the most unreliable service in the nation with no repercussions or action from the Michigan legislature. It's left our communities without power or stuck struggling to pay the bills. It has created dangerous public health conditions where people are without power for more than three days in the cold and are not able to use the medicine and medical machines they need to survive. People have lost their groceries, and our children have not been able to go to school.

Meanwhile, DTE has filed for a record-breaking rate increase that could increase electric bills by almost 14%, threatening to make electric bills even more unaffordable.

That's why I am asking you to hold or request hearings in the legislature's energy committees as soon as possible to hold both DTE and Consumers accountable for the massive power outages throughout their service territories. At these hearings it is critical that lawmakers not only hear from the utilities, but hear from outside experts, advocacy groups, and impacted community members as well.

Sincerely,

Ms. Victoria Person

Tell DTE no rate increases until they upgrade the power grid to withstand powerful storms in the future. In fact the oversight committee should reverse previous rate increases if DTE doesn't show proof of these upgrades being started by a certain date.

Sincerely,

Subject: DTE outage issues Oxford MI

You don't often get email from kellyfoukes@gmail.com. [Learn why this is important](#)

Hello, I am Kelly Foukes and I live in Oxford township. I'm writing to ask that as chair of the Energy Committee, Rep. Scott (or Sen. McCann) hold hearings as soon as possible to hold DTE Energy accountable for the massive power outages throughout their service territory. At these hearings it is critical that you not only hear from DTE, but hear from outside experts and impacted community members as well. DTE ratepayers consistently suffer from their outdated and unreliable infrastructure, while DTE rakes in massive profits at our expense. This inferior infrastructure has been causing havoc in our area for at least the 12 years that I have lived at my current address and goes well beyond large weather events. Power outages occur in our area regardless of weather conditions with little to no realistic explanation or resolution from DTE. This has been an amplified hardship now that many of us are working from home and for me personally with a spouse battling cancer. We can't physically drag out the generator every time our power goes out, nor should we have to. We have filed multiple frequent outage complaints with excuses ranging from weather to trees but still our area has outages, with our neighbors right next door and directly across the street will have their power on. There is clearly an issue that is not being addressed.

Thank you for you time,
Kelly Foukes

Dear Representative Helena Scott,

Each time the power goes out, our community takes a hit. We spend hundreds of dollars replacing spoiled food, and miss days of work or school. For elderly family members and neighbors, who are vulnerable to heat exposure, and for people with medical devices that require electricity, blackouts can be deadly. Nearly a million people in Michigan are without power today, with nighttime temperatures falling well below freezing in the coming days.

Meanwhile, our state's investor-owned monopoly utilities shovel profits to shareholders and evade accountability for the real costs of their failing infrastructure.

In short, hundreds of thousands of families are sitting in the cold without power again because DTE has prioritized shareholder profits over affordable, reliable electricity for customers. What's worse, DTE pours money into campaign donations and lobbying because it's paid off for them. More than 90 percent of state legislators took money from DTE in the 2022 election. They've effectively escaped accountability despite consistent public outrage at their awful service, long blackouts, and rising rates.

But it doesn't have to be this way. Michiganders shouldn't go days on end without power while nothing is done because we haven't mustered the political courage to stand up to an investor-owned utility bully.

That is why I am writing to encourage you to stand firmly in your values & show people whose side you're on. Customers deserve automatic, hourly compensation for hours in the dark – and utilities should not be able to raise rates to cover the costs of compensation if they perform worse than their peers in the industry.

We need reliable, affordable, people-centered energy that meets the needs of all Michiganders. When the power goes out, it's always an inconvenience, but for many it can have huge consequences for their health and finances.

Will you take action to reimburse customers who've been consistently failed by DTE, and take further action to hold DTE accountable for the damage they've caused our communities?

Thank you,

Sincerely,
Jennifer Veiga

Dear Representative Helena Scott,

I recently learned that DTE wants to raise rates again. Our power service is already unreliable, and a rate increase without an associated improvement in reliability is not acceptable.

Please help to hold DTE and Consumers Energy accountable for the recent outages. They must improve their performance. They hold natural monopolies in their service areas and cannot take their customer base for granted.

Sincerely,
Paul Riherd
