**To:** Molly Wingrove  
**Subject:** OPPOSITION for HB 4603& 4604

*Dear Representative,*

*I am writing to express my opposition to House Bill 4603. This bill would require school districts to use design-build contracting for the construction of certain school buildings. Design-build contracting is a method of project delivery in which a single entity is responsible for both the design and construction of a project. While this method can be efficient and cost-effective, it also raises concerns about quality and accountability.*

*As an architect, I am concerned that the use of design-build contracting for school construction could lead to lower quality buildings. When a single entity is responsible for both the design and construction of a project, there is a risk that they may cut corners on design or construction in order to save money. This could lead to problems with the building's performance, durability, or safety.*

*I am also concerned that design-build contracting would reduce the architect's role in the project. In a traditional project delivery method, the architect is the prime contractor and is responsible for overseeing the work of all other contractors. In a design-build project, the architect is often relegated to a subordinate role. This can reduce the architect's ability to ensure that the building is designed and constructed to meet the needs of the client.*

*In addition to these concerns, I believe that House Bill 4603 is unnecessary. There is no evidence that design-build contracting is the best way to deliver school construction projects. In fact, there are many examples of successful school construction projects that have been delivered using traditional project delivery methods.*

*I urge you to vote against House Bill 4603. This bill is bad for our children, our schools, and our state.*

*Sincerely, John Eckstein*

I am opposed to HB 4603 & 4604.

**Subject:** Opposition to HB 4603 & 4604

Molly,

My Name is Arthur W Brintnall PS  
4266 Yorkshire Dr  
Hudsonville Mi 49426

I am in opposition to HB 4603 & 4604 because the revisions to the design build could lead to a company having too much influence on the design professionals. The individuals working for a construction company may cause the design professional to cut corners. If this happens then the potential for catastrophic events could happen on those properties.

Thank you,  
Art

**From:** Brian Moore <BMoore@rossetti.com>  
**Sent:** Monday, October 2, 2023 9:58 AM  
**To:** Molly Wingrove  
**Subject:** Oppose HB 4603 & 4604

Good morning Molly,

I am reaching out to oppose HB 4603 & 4604 as these bills represent a complete misunderstanding by the Michigan legislature of how the construction process works. If these bills pass, it will result in lower quality buildings, which produces more waste, more cost, and requires energy over time. It undermines the work that architects provide, which is to not only provide good design, but to look out for the health, safety, and welfare of the public. I am not sure if you have ever worked with contractors on a project before, but the vast majority of them are concerned with cutting corners and costs over public safety. It is absolutely astounding how often architects need to fight the contractors just to have them following the bare minimum laid out in the building code requirements, including on issues that affect public safety. Architects need to have a seat at the table and these bills undermine that, creating a less safe environment for Michigan. In the long run, these bills will create higher costs in Michigan as buildings need to be rebuilt sooner and lower the quality of wellness and safety for the Michigan public. As a representative, it is your responsibility to make sure this bill does not pass.

Thank you,

**Brian Moore AIA**

**Subject:** OPPOSITION for HB 4603& 4604

I am opposed to HB 4603 & 4604.

In my 25 years of working with and for contractors, I have experienced a great difference in the ability for a facility to be constructed to meet basic, minimal compliance with buildings codes and standards when decision making is in the hands of a contractor. From inaccessible buildings and spaces to out-right dangerous construction, only a licensed Architect, held to a Standard of Care and accountable to the public for their health, safety, and welfare, is educated, trained, and continuously accredited through education and board registration should be in charge, along with Authorities Having Jurisdiction, of what is and is not safe in the built environment.

Please do not support HB 4603 & HB 4604.

Sincerely,

Robert E. Ferguson, AIA, NCARB, CDT, LEED® AP

**Subject:** OPPOSITION for HB 4603& 4604

I am opposed to HB 4603 & 4604. They weaken the value of architects to the built environment  
In Michigan, Architects have professional terminal degrees AND must submit 24 credits of continuing education per year to MI LARA in not only quality design but also code compliance and preserving the health, safety, and welfare of building users. These bills are being promoted by contractors, who are not trained as building designers or for life safety.

Mrs. Wingrove,

I hope this email finds you well. I am writing as a concerned Michigan resident and architect to express my strong opposition to House Bills 4603 and 4604, which have recently come to my attention. I believe these bills could have detrimental consequences for our state's residents and values. House Bill 4603 and House Bill 4604, as I understand them, have raised significant concerns in our community.

Best,  
Edmond Bardhi

I am opposed to HB 4603 & 4604.

Don't underestimate the role of independent architects in balancing the opinions of contractors in the design and construction of safe buildings that serve the public. The balance of power between owner/client, contractor and architect protects the health, safety and welfare of the public. Shifting more control to the contractor, by permitting the contractor to employ, and therefore control, the architect will upset this balance resulting in more buildings that are cheaper to build in the short run, but more expensive to operate and maintain in the long run, potentially also buildings that are less economically viable, less sustainable, and less healthy.

As a retired architect with years of experience in working with developers, I understand the intense pressure to control costs. My success in completing large, complex adaptive use of historic buildings within schedule and budget, is a testament to the success of the existing requirements for independent architects. My voice at the table, working with the contractors and trades to find cost effective solutions often resulted in buildings of greater value to their owners and better for the public. My voice was effective, just because I was independent of the contractor.

I strongly urge you to vote no on HB 4603 and 4608.

**Subject:** OPPOSITION for HB 4603& 4604

I am opposed to HB 4603 & 4604.

I am a 75 year old Architect. I have been working since 1970 in Architecture.  
Design Build does not work for buildings such as Schools.

Architects work with clients and the Contractor to get the best building (as possible).  
Design Build may use a young Architect up front on a project but that person does not  
follow through the entire job.

Architects form teams with Contractors but are not controlled by the Contractor.  
Architects work for the owner not the Contractor. They represent the owner on the project.  
The Contractor works for the owner also.

Thank you,

**To:** Rep. Julie Rogers (District 41)  
**Cc:** Marissa LaDitka; Molly Wingrove; jeffrey@sfarch.us  
**Subject:** Opposed to HB 4603 & 4604

Happy weekend Representative Rogers.

I would like to express my sincere and deep opposition to HB 4603 and 4604. As an active practicing Architect and Architectural firm owner with over 27 years of experience, I'm shocked that these bills are even up for conversation. These bills simply undermine the very nature of the current Michigan and national structure of how Architects protect the health, safety and welfare of the public. With my 7 years of architectural education and three additional years of formal internship prior to sitting for 9 exams to become a registered Architect, I can clearly articulate that our profession is one of high integrity and focus on what is good for the public. We work hard each and every day to ensure a balance is achieved between the health of our communities, the needs and financial goals of owners and the many many regulating codes and standards which are constantly updated. We are the ones who guide this balance. Contractors support our efforts with great cost info, but they should never lead this process. They are simply not trained to do so, in Any way.

This balance is not achievable in a design-build format with a single architect working for a potentially bottom dollar contractor. Their world is often highly competitive and it is easy to win a project based on price. And you can be sure that price driven design is simply bas design. It is not balanced. Unfortunately, our public schools are already often treated poorly in terms of designing facilities which can maximize the education of our most precious children. The proposed format will significantly degrade the goal of creating environments which focus on the welfare of educators and the children entrusted to them. In my many years of experience, the only time I have seen design-build be truly worthwhile was in large warehouses or manufacturing facilities where few humans occupy the building. Products don't care how the building works for them. Children and teachers absolutely will feel the affects of a dollars driven project.

Furthermore, Michigan currently requires 2/3 of ownership of an Architectural firm to be registered Architects. Our State does not even allow interior designers to be owners. This is tragic that we would consider a contractor to possess any kind of ability to run a design project when the State clearly does not think Interior designers should be allowed to. Interior designers are thoroughly trained in space planning and creating environments that are healthy and safe for people. This should be reason enough to stop these bills in committee.

For reference, my firm does not do public school facilities, so I do not specifically have a horse in this race, so to speak. However, I am adamant about creating great places for people to be their best. I know from experience the power of well designed places. And I know how contractor led projects fail on almost every level for these goals.

Thank you so much for considering my thoughts and for all you do for our State. If I might be of assistance, please feel free to reach out.

Respectfully -Bill

**Sent:** Saturday, September 30, 2023 11:06 PM  
**To:** Molly Wingrove  
**Subject:** HB4603, 4604 opposition

Hello,

I am Elizabeth (Heidi) Pfannes and I have worked in the architecture/engineering field for 37 years. I have worked in Michigan my entire career. 27 years for a firm in Kalamazoo and 10 years in Detroit. I have worked with a variety of client types. My degree is in Interior Design but have always worked in Architectural Firms.

I am very concern about these bills that are being proposed. HB4603 and HB4604 are being introduced to undermine the architecture/engineering professions. Design Build contractors are trying to increase their profits by cutting out the architect/engineers. In reality the collaboration between architects/engineers with contractors in a design build partnership works well but we must be careful that the Architects & Engineering firms are balancing the needs of clients with the speed and cost of the project from the construction team's priority. Architects & engineering must remain an entity that have the authority to advocate for the planning and design priorities to protect the interests of clients.

Architects have extensive training and licensing requirements for a reason. They are responsible for the health and welfare of building users and they are trained very differently than contractors. Please Do your part to assure Michigan honors the built environment by holding up the standards in licensing for these very important professions.

Elizabeth (Heidi) Pfannes
