

As a constituent of Michigan's 9th district, I want to voice my position. I am in support of HB 5178 & 5179 with the addition of language to include 2nd & 3rd party distributions. This will allow for the broadest possible access to life-saving public health supplies to those most impacted by overdose, HepC & HIV. Social services organizations & others would then not fear arrest or criminal prosecution.

Thank you,

Alexandra Zurkan
