¹Starting in 2012, grants for Intensive Supervision are included in the Supervision Programs category; grants for Pretrial Services are included partially in the Supervision Programs category and partially in the Assessment Services category.

²Starting in 2012, grants for substance abuse treatment are included in the Group-Based Programs category; funding remaining in the Substance Abuse category is for substance abuse testing.

³Starting in 2012, grants for Employment and Training, Mental Health, and Education are included in the Group-Based Programs category.

⁴Other category includes reserve funding, as well as grant funding for pilot programs, and grant funding for programming that does not fit the descriptions or criteria of other listed categories (i.e., fugitive apprehension).

The commitment of funds among program categories has changed over time, and is expected to continue to change as increased efforts are made throughout the state to address recidivism reduction through improving treatment effectiveness. More specifically, it is expected there will be a continued shifting of resources to cognitive behavioral-based and other programming for high risk of recidivism offenders. This shifting or reallocation of resources reflects the effort and commitment of local jurisdictions to improve treatment effectiveness and reduce recidivism through the development and implementation of new approaches to substance abuse treatment, education and employment programming, improved case planning, sanction and service matching, case management functions, and strengthened monitoring and evaluation capabilities.
