

**ECONOMIC OUTLOOK
AND
REVENUE ESTIMATES
FOR
MICHIGAN**

**FY 2023-24
THROUGH
FY 2025-26**

Mary Ann Cleary, Director

January 2024

FOREWORD

This report includes a national and state economic forecast for calendar year (CY) 2023 through CY 2026. It also presents preliminary General Fund/General Purpose (GF/GP) and School Aid Fund (SAF) revenue for fiscal year (FY) 2022-23, revised revenue estimates for FY 2023-24 and FY 2024-25, and initial estimates for FY 2025-26. Estimates reported herein will be presented to the Consensus Revenue Estimating Conference on January 12, 2024, and will be used to facilitate the consensus estimating process.

This report includes House Fiscal Agency (HFA) analyses of important factors that will affect state and national economies through the year 2026, and estimates of the Countercyclical Budget Stabilization Fund, state compliance with the Constitutional State Revenue Limit, and GF/GP and SAF year-end balances.

Benjamin Gielczyk, Associate Director, and Jim Stansell, Senior Economist, are the authors of this report. Kathryn Bateson, Administrative Assistant, prepared the report for publication.

ECONOMIC OVERVIEW AND FORECAST

This section presents the economic forecast used by the House Fiscal Agency to produce its revenue forecasts for FY 2023-24 through FY 2025-26. In developing the U.S. and Michigan forecasts, key macroeconomic data such as employment, interest rates, business investment, light vehicle sales, international trade, oil prices, and consumer spending are examined with the goal of combining these variables along with others into an overall snapshot of the U.S. economy for the past year, current year, and two subsequent years. The key segments for Michigan include the automotive sector, the labor force and employment, wage and salary income, and inflation rates.

The national economy held up better than expected in CY 2023, with estimated 2.5% real GDP growth, despite aggressive rate hikes by the Federal Reserve to mitigate inflationary pressures. Prior assumptions that inflation moderation would come at the expense of a strong labor market have not come to fruition. Inflation has moderated, albeit not quite to the Fed's 2% target, and the labor market remains strong. That said, the forecast assumes the labor market will eventually soften and the economic growth will slow to 1.7% in CY 2024 but avoid a recession. Real GDP will rebound to 2.0% in CY 2025 and 2.1% in CY 2026.

Employment growth will moderate throughout the forecast window, averaging about 0.8% annual growth, and the unemployment rate will peak at 4.2% in CY 2025 before dropping back to 4.1% in CY 2026. Inflation will continue its downward trend and decline to 2.2% in CY 2026.

Michigan's economy and state revenue are significantly affected by the strength of the national economy. The Michigan outlook projects a slightly weaker employment picture than the national economy with softer employment growth and unemployment peaking at 4.4% in CYs 2024 and 2025 before dropping to 4.2% in CY 2026. A tight labor market will run up against an aging workforce and Michigan's population growth challenges.

Total Wage and Salary Employment

Figure 1 shows the monthly percent change in total wage and salary employment for both the U.S. and Michigan from January 2000 through November 2023.

U.S. Wage and Salary Employment

U.S. employment peaked in February 2001, and then began a long slide that did not end until August 2003. During this 30-month period, more than 2.7 million jobs were lost – about 91,800 jobs per month on average. This decline was followed by 53 consecutive months of job growth, and by January 2008, more than 8.1 million jobs had been added.

The recession which began in February 2008 led to 25 continuous months of employment declines during which almost 8.8 million jobs were lost. Job gains finally reappeared in March 2010, and during the 128-month span of job growth that ensued, U.S. wage and salary employment surpassed the pre-recession peak and by February 2020, total cumulative growth during the expansion topped 22.8 million jobs.

The sharp decline brought about by COVID-19 saw employment drop back to roughly the same level as January 2000, but through November 2023 employment has grown by 26.6 million jobs and total employment is now 3.0% above pre-pandemic levels.

Michigan Wage and Salary Employment

Michigan endured more than a decade of job losses during the early 2000s, during which time wage and salary employment in Michigan dropped by almost 18% relative to January 2000. As the labor market began recovering from the Great Recession, steady job growth continued each year through 2019, although by the end of the decade annual gains were slowing. Still, by the end of 2019, total employment was within 5% of the January 2000 level.

As with employment nationwide, sharp declines occurred in March and April of 2020 as employment plunged well below Great Recession levels. As of November 2023, Michigan has added back about 1.03 million jobs from the pandemic low point in April 2020, but is still about 68,600, or 0.6%, below the pre-pandemic level in February 2020.

U.S. and Michigan Motor Vehicle Industry

Early releases indicate that light motor vehicle sales totaled 15.5 million units in CY 2023, an increase of 12.7% from the 13.8 million vehicles sold in CY 2022. Light motor vehicle sales are forecast to increase to 16.0 million units in CY 2024 and continue growing to 16.5 million units in both CY 2025 and CY 2026, falling short of pre-pandemic levels throughout the forecast window.

The market share of imports and transplants (vehicles with a foreign nameplate that are made in the U.S.) has stabilized in recent years. As shown in **Figure 2**, the market share of the Detroit-3 auto manufacturers was 36.0% in CY 2023 and is expected to decline to 34.5% by the end of the forecast.

The level and composition of light motor vehicle sales as well as the extent to which the domestic nameplates can retain market share will have a direct impact on Michigan’s economy. In CY 2023, the Detroit-3 is expected to sell 5.6 million vehicles, which is on par with CY 2022. It is projected that the Detroit-3 will sell approximately 5.8 million vehicles in CY 2024 before sales decrease to around 5.7 million units in CY 2025 and CY 2026.

Figure 2
Detroit-3 Share of Light Vehicle Sales

U.S. Forecast Highlights

Real GDP growth is forecast to increase 1.7% in CY 2024, 2.0% in CY 2025, and 2.1% in CY 2026.

Inflation, as measured by the Consumer Price Index (CPI), is forecast to continue its downward trajectory, increasing 2.8% in CY 2024, 2.3% in CY 2025, and 2.2% in CY 2026.

Light vehicle sales are forecast to increase to 15.5 million units in CY 2023, 16.0 million units in CY 2024, 16.5 million units in CY 2025, and 16.5 million units in CY 2026. The import share of light vehicles is forecast to increase from 21.8% in CY 2023 to 23.7% in CY 2026.

Wage and salary employment growth is expected to increase 2.3% in CY 2023, 1.1% in CY 2024, 0.6% in CY 2025, and 0.8% in CY 2026.

The national unemployment rate is expected to be 3.7% in CY 2023; it is forecast to increase to 4.1% in CY 2024 and 4.2% in CY 2025 before decreasing slightly to 4.0% in CY 2026.

Interest rates on three-month T-bills are expected to increase from 5.07% in CY 2023 to 5.20% in CY 2024, and then decrease to 4.61% in CY 2025 and 3.97% in CY 2026 as the Federal Reserve lowers interest rates in response to declining inflation.

Michigan Forecast Highlights

Michigan wage and salary employment growth is expected to grow by 1.5% in CY 2023, 0.8% in CY 2024, 0.6% in CY 2025, and 0.4% in CY 2026.

Michigan's unemployment rate is expected to be 4.0% in CY 2023; it is forecast to increase to 4.4% in CY 2024 and CY 2025 before decreasing to 4.2% in CY 2026.

Michigan personal income is expected to increase by 4.7% in CY 2023, 3.6% in CY 2024 and continue to grow at rates of 4.3% in CY 2025 and 3.7% in CY 2026.

Michigan wage and salary income is expected to increase 6.2% in CY 2023; it is forecast to increase 4.3% in CY 2024, 3.8% in CY 2025, and 3.3% in CY 2026.

Inflation (as measured by the Detroit Consumer Price Index) is forecast to increase 2.1% in CY 2024, 2.0% in CY 2025, and 1.9% in CY 2026.

Additional details of the U.S. and Michigan forecasts are presented in **Table 1** on the following page.

RISKS AND UNCERTAINTIES

An economic forecast is based on the best information available at the time the forecast is prepared. Because information and foresight are not perfect, risks and uncertainties are inherent in any forecast, and variations in the underlying factors can exert either optimistic or pessimistic influences on the forecast. Some of the more prevalent risks are highlighted below.

Inflation and Monetary Policy

Elevated inflation levels led the Federal Reserve to aggressively raise rates throughout CY 2022 and CY 2023 reaching the forecasted terminal range of 5.25-5.50%. As inflation subsides and the labor market cools from its current levels, the forecast assumes the Fed will begin to loosen monetary policy beginning in the latter half of CY 2024. While the forecast assumes the Fed is successful at reducing inflation to levels closer to its target rate in the near term, if inflation persists at levels above the Fed's target necessitating further monetary tightening or maintaining rates higher for longer this would present a downside risk to the forecast.

Geopolitical Conflict and Global Economic Conditions

The Russia-Ukraine and Israel-Hamas conflict continue to present challenges on multiple fronts as countries respond politically, militarily, and economically. Certainly, a quicker end to the conflicts presents an upside risk, while a protracted or intensified set of conflicts and a more pronounced slowdown in global growth is a downside risk to the forecast.

Financial Setbacks

Higher for longer interest rates could lead to constrained lending for both businesses and households, which could restrain economic growth in the near-term. On the other hand, interest rates below those forecasted could lead to increased consumer and business loan demand and a quicker rebound in the housing market, among other things. Therefore, the direction of lending standards is both an upside and downside risk to the forecast

There has been an upward trend in commercial real estate loan delinquencies since the fourth quarter of 2022. Stress in the commercial real estate market does present a downside risk to the forecast as it could precipitate further bank stress.

GF/GP AND SAF REVENUE

Revenue estimates are based on the economic performance of the components of national and state economies discussed in the previous section. This section contains the House Fiscal Agency's January 2024 baseline and net General Fund/General Purpose (GF/GP) and School Aid Fund (SAF) estimates as well as recommended revisions from the May 2023 Consensus Revenue Estimating Conference (**Table 2**), detailed net GF/GP estimates (**Table 3**), and detailed net SAF (**Table 4**) estimates. Also, included in this section are estimated year-end balances for GF/GP, the SAF, the budget stabilization fund (BSF), and the state revenue limit calculation.

Baseline and Net GF/GP and SAF Revenue Estimates

Table 2 reports GF/GP and SAF revenue in terms of baseline and net revenue. Baseline revenue does not include the impact of partial-year policy changes or certain other policy changes that have recently been adopted. Baseline estimates are comparable across fiscal years and demonstrate the changes to state revenue that are driven by changes in the economy. The preliminary total baseline GF/GP and SAF revenue is \$34.8 billion in FY 2022-23. It is forecast to decrease 0.2% in FY 2023-24 and increase 1.8% in both FY 2024-25 and FY 2025-26.

Net revenue captures the effects of all policy changes and represents actual resources available. Preliminary total net GF/GP and SAF revenue is \$31.7 billion in FY 2022-23, which would be a 4.2% decrease from FY 2021-22. It is forecast to decrease 0.2% in FY 2023-24 before increasing 2.0% in FY 2024-25 and 3.1% in FY 2025-26.

Table 2 also shows the May 2023 adjusted consensus estimates and the recommended revisions to these estimates for FY 2022-23 through FY 2024-25. The May 2023 adjusted consensus estimates include the CY 2023 consensus estimates plus enacted tax changes since the May 2023 consensus revenue estimating conference.

Preliminary FY 2022-23 figures suggest an increase of \$183.1 million from the May 2023 adjusted consensus estimates, due in part to strong use tax collections, lottery, and other non-tax revenues, primarily interfund borrowing interest. The recommended revision for FY 2023-24 is an increase of \$538.6 million primarily due to increased revenues from the income tax, use tax, and non-tax sources (interfund borrowing interest and escheats) and the shift of approximately half of the earned income tax credit impact to FY 2022-23 from

FY 2023-24. Finally, the recommended revision for FY 2024-25 is \$103.4 million due sustained upside revisions to non-tax revenue, online gaming, and lottery offsetting downward revisions to the income tax and sales tax.

GF/GP Revenue by Source

GF/GP Tax Revenue

Table 3 - Relative to FY 2021-22, preliminary GF/GP tax revenue decreased 13.0% to \$12,645.4 million in FY 2022-23. Net income taxes (after refunds) accruing to the general fund decreased by 16.9% due to the reduction of the income tax to 4.05% and the adoption of an increase to the earned income tax credit, and corporate income tax revenue dropped by 20.7% due to the earmarking of \$600.0 million of the CIT revenue. GF/GP tax revenue in FY 2023-24 is estimated to be \$12,686.3 million, an increase of \$40.9 million, and \$13,187.8 million in FY 2024-25, an increase of \$501.5 million. GF/GP tax revenue is estimated to increase 5.8% in FY 2025-26.

Total GF/GP Net Revenue

Net GF/GP revenue includes non-tax revenue and represents the amount available for expenditure. Preliminary net GF/GP revenue is expected to be \$13,843.6 million in FY 2022-23. In FY 2023-24 it is forecast to be \$13,672.3 million, a decrease of \$171.3 million, and \$14,003.2 million in FY 2024-25, an increase of \$330.9 million, or 2.4%. Net GF/GP revenue is estimated to increase 4.5% in FY 2025-26 to \$14,628.5 million.

SAF Revenue by Source

Total Net SAF Revenue

Table 4 - Preliminary net SAF revenue is anticipated to decrease 0.1% to \$17,869.1 million in FY 2022-23. Net SAF revenue is forecast to be \$17,992.6 million in FY 2023-24, an increase of \$123.5 million, or 0.7%. Net SAF revenue is estimated to increase 1.6% in FY 2024-25 and 2.1% in FY 2025-26.

BSF Year-End Balance

The Counter-Cyclical Budget and Economic Stabilization Fund (BSF), the state's rainy day fund, is a reserve of cash to contribute to or withdraw from throughout economic and budget cycles. A statutory BSF trigger calculation – based on Michigan personal income less transfer payments adjusted for inflation and actual or net GF/GP revenue – indicates whether a pay-in (deposit) is recommended. Under the provisions of 2018 PA 613, a pay-out (withdrawal) of up to 25% of the prior year ending BSF balance would be indicated if personal income growth is negative. In either case, the recommendation is statutory; it cannot mandate an appropriation, and 2018 PA 613 specifies that a legislative appropriation is required for transfers both into and out of the fund.

In addition to the BSF calculation, 2014 PA 186 amended the Michigan Trust Fund Act to require annual \$17.5 million deposits of tobacco settlement revenue to the BSF from FY 2014-15 through FY 2034-35. **Table 5** provides details on deposits, withdrawals, interest earnings, and the year-end balance from FY 1990-91 through FY 2025-26. Estimates include the impact of 2014 PA 186 amended the Michigan Trust Fund Act to require annual \$17.5 million deposits of tobacco settlement revenue to the BSF from FY 2014-15 through FY 2034-35.

After an appropriated pay-out of \$350.0 million, the BSF ending fund balance at the end of FY 2019-20 was \$829.1 million. The balance increased to \$1,588.9 million after appropriations of \$35.0 million and \$500 million in FY 2020-21 and \$180.0 million in FY 2021-22. An additional \$100.0 million was appropriated for deposit in both FY 2022-23 and FY 2023-24, which would take the BSF balance to just shy of \$2.0 billion at the close of FY 2023-24. Relatively high interest rates will continue to provide elevated investment returns for the BSF.

The statutory BSF trigger calculation, based on Michigan personal income less transfer payments adjusted for inflation and actual or net GF/GP revenue, indicates whether deposits (pay-ins) or withdrawals (pay-outs) are recommended for a fiscal year. Regardless of the calculated amounts, however, all deposits and withdrawals must be appropriated. Based on the formula, no pay-ins would be indicated for FY 2023-24 and FY 2024-25. A pay-in of \$53.2 million would be suggested for FY 2025-26.

No pay-outs would be indicated for FY 2023-24, FY 2024-25, or FY 2025-26.

After adjusting for the required \$17.5 million deposits and estimated interest earnings, the year-end balance is projected at \$1,996.5 million for FY 2023-24, \$2,098.4 million for FY 2024-25, and \$2,179.1 million for FY 2025-26.

Compliance with the State Revenue Limit

Article IX, Section 26 of the 1963 Michigan Constitution, which was approved by a vote of the people in 1978, sets a limit on the amount of revenue collected by the state in any fiscal year. As provided for in the Constitution, the revenue limit is calculated as 9.49% of total state personal income (which is the broadest measure of state economic activity) in the previous full calendar year prior to the fiscal year in which the revenues are measured.

The revenue to be considered in the revenue limit includes not only state taxes, but also fees, licenses, and interest earned. Federal aid is not included in the revenue limit calculation. Article IX, Section 26 of the 1963 Michigan Constitution provides that:

... For any fiscal year in the event that Total State Revenues exceed the limit established in this section by 1% or more, the excess revenues shall be refunded pro rata based on the liability reported on the Michigan income tax and single business tax (or its successor tax or taxes) annual returns filed following the close of such fiscal year. If the excess is less than 1%, this excess may be transferred to the State Budget Stabilization Fund

Furthermore, limit established in Section 26 by Article IX, Section 28 prohibits the state from spending any current-year revenue in excess of that amount.

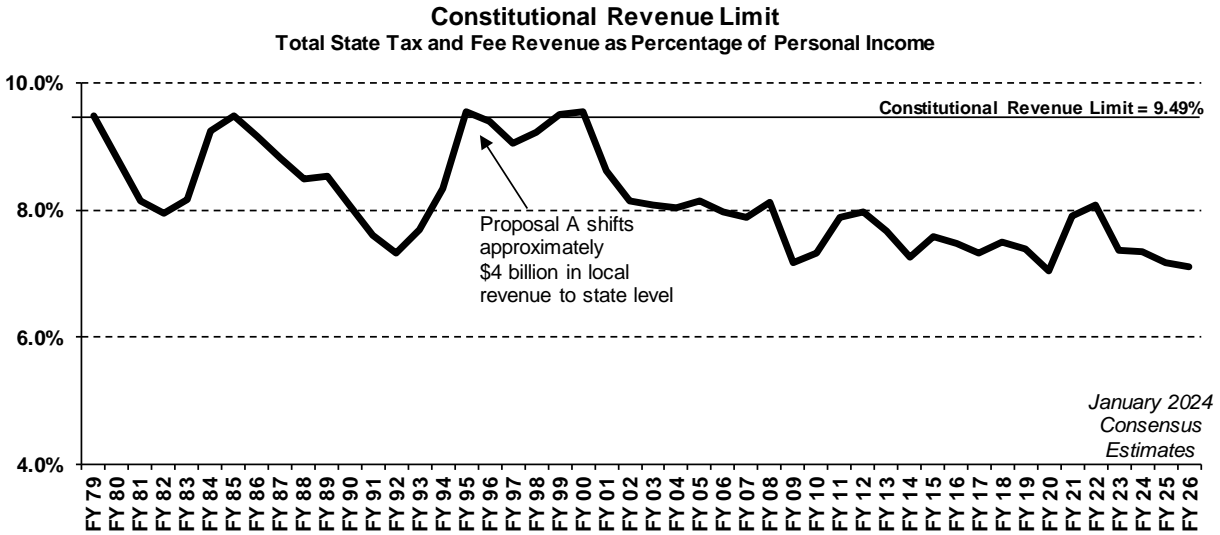

As shown in **Table 6** and **Figure 3**, the FY 2022-23 revenue limit calculation is expected to show state revenue collections at \$12.0 billion below the revenue limit. For FY 2023-24, state revenue is estimated to be below the limit by \$12.2 billion. For FY 2024-25 and FY 2025-26, state revenue is estimated to remain well below the revenue limit – by \$13.9 billion and \$14.8 billion, respectively.

Figure 3

HFA Estimates of Year-End Balances

Table 7 reports HFA estimates of year-end balances for GF/GP, the SAF, and the BSF. FY 2022-23 estimates are based on preliminary year end revenues, year-to-date appropriations, and K-12 cost estimates. FY 2023-24 estimates include HFA revenues, year-to-date appropriations, and K-12 cost estimates.

BSF estimates are based on the current balance and HFA estimates of future deposits and interest earned.

Table 7
YEAR-END UNRESERVED BALANCE ESTIMATES
(Millions of Dollars)

	Preliminary FY 2022-23	Estimated FY 2023-24
General Fund/General Purpose	\$3,767.0	\$1,290.0
School Aid Fund	\$1,953.3	\$343.6
Budget Stabilization Fund	\$1,780.5	\$1,996.5

Note: School Aid Fund revenue is restricted; any year-end balance is carried forward to the subsequent year.
